To whom it may concern,

I am writing to recommend Andy Watson as an excellent speaker regarding the FAA Air Traffic Control System. As an ATC controller with experience in numerous facilities, he brings an insight into aircraft operations and safety that pilots and aviation enthusiasts will find both informative and captivating. His presentation at the Virginia Wing CAP's annual flight clinic was an outstanding success, and easily the best attended seminar that day (over 50 pilots and CAP aircrew attended). The only regret we had regarding Andy's presentation was not scheduling more time for it! Speaking both for myself and the pilots of Virginia Wing, we heartily recommend Andy Watson to any organization wanting to know more about the FAA's Air Traffic Control system in the U.S. today.

Sincerely,

A handwritten signature in black ink, appearing to read "Joseph R. Vazquez".

JOSEPH R. VAZQUEZ, Maj Gen, CAP
Standardization/Evaluation Officer
